PART.02

Product Overview

01 | PAX IM30 Intelligent Unattended Payment Terminal

PAX IM30

Perfect For: Vending Machines • Parking Systems • Unattended Retail • Self-Service Kiosks

[Learn More](#)

The PAX IM30 is an intelligent unattended payment terminal engineered for automated and self-service commerce. Combining secure payment acceptance, flexible system

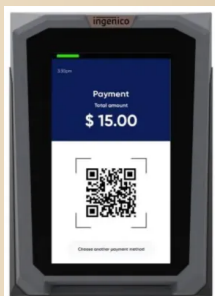

integration, and remote operational management, it can be seamlessly embedded into vending machines, parking payment systems, self-service kiosks, and unattended retail equipment. The terminal supports card-based, contactless, and leading mobile wallet payment methods.

With reliable connectivity, consistent transaction performance, and around-the-clock operational capability, the PAX IM30 enables businesses to automate payment collection, monitor device performance, and manage distributed terminals more efficiently. It helps reduce labor and maintenance requirements while delivering a secure, fast, and frictionless self-service payment experience.

*Perfect For : Vending • Parking •
Unattended Retail • Self-Service*

02 | Ingenico AXIUM SX7000 Smart Self-Service Payment Terminal

Ingenico AXIUM SX7000

Perfect For: Retail Kiosks • EV Charging Stations • Automated Checkout • Self-Ordering Systems

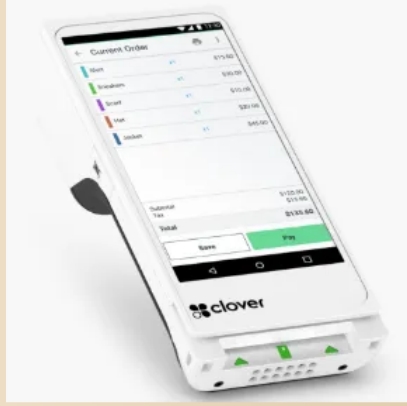

[Learn More](#)

The Ingenico AXIUM SX7000 is a high-performance Android-based payment terminal designed for unattended commerce, automated retail, and advanced self-service applications. It features a large full-touch display and supports

chip, contactless, QR-code, and leading mobile wallet payments, with an optional magnetic stripe reader available for additional payment flexibility.

Engineered with a rugged form factor, adaptable integration capabilities, and dependable performance across both indoor and outdoor environments, the AXIUM SX7000 can be seamlessly incorporated into self-ordering kiosks, retail terminals, vending machines, parking payment systems, and EV charging equipment. It provides businesses with a secure, scalable payment infrastructure while delivering consumers a modern, intuitive, and seamless checkout experience.

Perfect For : Retail Kiosks • EV Charging • Automated Checkout

Clover Flex

Perfect For : Retail Kiosks • EV Charging Stations • Automated Checkout • Self-Ordering Systems

Learn More

Clover Flex is a portable smart POS terminal designed to bring payment acceptance, order processing, customer engagement, and store management together in one compact device. It supports swipe, chip, contactless, and leading mobile wallet payments, allowing businesses to complete transactions and serve customers from virtually anywhere.

From tableside ordering and mobile retail checkout to line-busting, pop-up events, and trade show sales, Clover Flex enables employees to process orders and payments directly at the point of interaction. Its flexible mobility helps reduce customer wait times, improve service efficiency, and create a faster, more personalized checkout experience.

*Perfect For : Restaurants • Retail •
Tableside Service • Mobile Sales*

PART.03

U.S. Smart Vending Market Opportunity

Driven by contactless payments, 24/7 accessibility, and connected operations, smart vending is expanding from traditional snack and beverage machines into a broader unattended retail ecosystem.
